

# Data-driven 2021: Predictions for a new year in data, analytics and AI

Dr. Jans Aasman's 2021 industry prediction was covered by ZDnet.

Jans Aasman, CEO of Franz Inc. believes graph analytics will significantly impact the effectiveness of COVID-19 contact tracing:

“Leading healthcare institutions will create Event Knowledge Graphs centered around a COVID patient and analyze all individuals and places the infected person came within 6 feet of, for 15 minutes or more [and]...will advise potentially infected people to be tested and quarantined to slow the spread of the disease.”
