

Supply Chain Risk Management System Solves Complex Problems in Critical Supply Chains

Franz leveraged its decades of experience in artificial intelligence, machine learning and semantic graph database technology to help Essilor develop and deploy an internal supply chain risk management system.

Supply chains for materials, components and even finished products have become ever more complex.

The complexity of Essilor's supply chain infrastructure is no exception. In particular, tracking product packaging and fulfilling orders efficiently has proven to be difficult. Essilor is a multi-national ophthalmic optics company and part of the EssilorLuxottica SA group, which sells global brands such as Ray-Ban, Oakley and Varilux, among others. Essilor carries hundreds of thousands of stock and finished products that are fabricated at many different labs in different countries and sold all over the world.
