Chaos Orchestra

Join host, Boris Shalumov with special guest, Jans Aasman for this episode of Chaos Orchestra.

Can Knowledge Graphs help to build better Cognitive Models? How will Knowledge Graphs look like in the future and how will we interact with them? Why didn’t Knowledge Graphs solve COVID-19-related data problems? How far away are Technocracy and Digital Immortality?

Extrapolating from 40 years of Knowledge Graphs and cognitive models with Dr. Jans Aasman, CEO of Franz Inc.

About Chaos Orchestra

In just a few years Knowledge Graphs have exploded in usage, as has their impact in the world of Artificial Intelligence. Semantic AI has become a significant part of text analytics, search engines, chat-bots and more. And yet, few people outside of niche tech communities are fully aware of how semantic knowledge graphs can be leveraged. In the Podcast “Chaos Orchestra” we will explore how Knowledge Graphs can be applied over the next decade to boost many areas of Artificial Intelligence and address the most pressing challenges of our times.
