

# PitchFest 2023: Unlocking the Vision of the Financial Data Transparency Act

Franz Inc. has been selected to participate in the Data Foundation's PitchFest, Unlocking the Vision of the Financial Data Transparency Act.

Franz will be presenting **"A Visual Time Machine for Influence Networks in a National Legal Entity Knowledge Graph"**

Once implemented, the FDTA will improve efficiency and government operations, reduce compliance burden, and improve data accessibility, searchability, and comparability to the benefit of regulators, investors, companies, and society. The FDTA encourages financial regulators to harmonize data collections and standards on information already collected – moving to machine-readable forms, reduce filers' compliance burden, increase analytical capabilities, and enhance transparency and accountability. The new law amends securities and banking laws to make the information reported to financial regulators including the Securities and Exchange Commission, Consumer Financial Protection Bureau, and Financial Deposit Insurance Commission, among others, electronically searchable and to further enable the development of regulatory technologies and artificial intelligence applications.
