Franz Inc. named to the Big Data 50 — Companies Driving Innovation in 2017

Leading Semantic Graph Database and Artificial Intelligence Provider Recognized for Delivering Business Value

OAKLAND, Calif. — September 13, 2017 — Franz Inc., an early innovator in Artificial Intelligence and leading supplier of Semantic Graph Database technology — AllegroGraph, today announced that it has been named to the Database Trends and Applications Big Data 50 — 'Companies Driving Innovation in 2017'.

The world of data management is constantly changing. Evaluating new and disruptive technologies, as well as when and where they may prove useful, is the challenge. Against the rapidly evolving big data scene, this year, Big Data Quarterly presents the newest "Big Data 50," an annual list of forward-thinking companies that are working to expand what's possible in terms of collecting, storing, and deriving value from data.

AllegroGraph is a database technology that enables businesses to extract sophisticated decision insights and predictive analytics from highly complex, distributed data that cannot be uncovered with conventional databases. Unlike traditional relational databases or other NoSQL databases, AllegroGraph employs semantic graph technologies that process data with contextual and conceptual intelligence. AllegroGraph is able run queries of unprecedented complexity to support predictive analytics that help organizations make more informed, real-time decisions.

AllegroGraph has been widely recognized and endorsed within the industry as the popularity of Graph databases has skyrocketed — growing nearly 500% in the past two years.

AllegroGraph was recently named a Leading Database Solution by CIOReview, awarded Best in Semantic Web Technology & Leader in Graph Database Products by Corporate America, PharmaTech Outlook has named Franz a Top Ten Solution Provider, and Bloor Research positioned AllegroGraph as a 'Champion'.

About DBTA

Database Trends and Applications is a magazine covering data and information management, big data, and data science. In addition, our website, dbta.com, connects visitors with white papers, webinars, and other learning opportunities in the field. Our magazine and website delivers advanced trends analysis and case studies serving the IT and business stakeholders of complex data environments. Our newsletters connect subscribers with news and analysis about the following subjects: Oracle News, Linux News, MultiValue News, General Information Management News, and more. For a complete list of e-mail newsletters, click here.

About Franz Inc.

Franz Inc. is an early innovator in Artificial Intelligence (AI) and leading supplier of Semantic Graph Database technology with expert knowledge in developing and deploying complex Big Data analytics solutions. AllegroGraph, Franz's flagship, high-performance, transactional, and scalable Semantic Graph Database, provides the solid storage layer for Enterprise grade NoSQL solutions. AllegroGraph's Activity Recognition capabilities provides a powerful means to aggregate and analyze data about individual and organizational behaviors, preferences, relationships, plus spatial and temporal linkages between individuals and groups.
