

Tohoku Medical Megabank Licenses AllegroGraph

OAKLAND, Calif. – February 26, 2014 – Franz, Inc. and Tohoku Medical Megabank announce the licensing of AllegroGraph. Graph databases, like AllegroGraph, are one of the new technologies encouraging a rapid re-thinking of the analytics landscape. By tracking relationships – in a network of people, organizations, events and data – and applying reasoning (inference) to the data and connections, powerful new answers and insights are enabled.

“Lots of answers can be provided by graph (network) analysis that cannot be answered any other way,” stated Dr. Jans Aasman, CEO of Franz Inc. “Fortune 500 companies recognize it is crucial that executives deploy Semantic Graph Technologies as a new competitive tool.”

About Tohoku Medical Megabank

Tohoku University Tohoku Medical Megabank Organization was founded to establish an advanced medical system to foster the reconstruction from the Great East Japan Earthquake. The organization will develop a biobank that combines medical and genome information during the process of rebuilding the community medical system and supporting health and welfare in the Tohoku area. The information from the brand-new biobank will create a new medical system, and, based on the findings of its analysis, the organization aims to attract more medical practitioners from all over the country to the area, promote industry-academic partnerships, create employment in related fields, and restore the medical system in Tohoku.

About Franz Inc.

Franz Inc. is an innovative technology company with expert knowledge in developing and deploying Graph Search solutions. AllegroGraph, Franz’s high-performance, transactional, and

scalable Graph Database, provides the solid storage layer for powerful Enterprise grade NoSQL solutions. Franz's products and Professional Services are uniquely positioned to help bring your complex ideas to reality.

AllegroGraph's Activity Recognition capabilities provides a powerful means to aggregate and analyze data about individual and organizational behaviors, preferences, relationships, plus spatial and temporal linkages between individuals and groups. Franz customers include Fortune 500 companies in the government, life sciences and telecommunications industries.
