The marvels of an event-based schema

Franz's CEO, Jans Aasman, recently wrote the following article for InfoWorld.

When working with various data types at the speed of big data, this method is ideal for integrating and aggregating assorted information for the holistic value it provides.

The issue of schema—and what is frequently perceived as its inherent difficulties—is becoming more important every day. Organizations are increasingly encountering decentralized computing environments typified by semi-structured or unstructured external data of varying formats, often requiring integration with internal, structured data for immediate business value.
